# EXTERIOR WOOD PROTECTOR GOLD STAR

Blackfriar® Exterior Wood Protector Gold Star provides protection from weathering for vertical & horizontal exterior wood. Suitable for rough sawn or smooth timber, its solvent-based, minimal build formula delivers UV protection & water repellency.

- For long lasting protection to all exterior wood.
- Protects against fungal & algal degradation.†
- Contains UV filter to protect from sunlight.
- Water-repellent.
- Resistant to extreme temperatures.
- Protection for up to 3 years.\*
- Available in 1L, 2.5L 5L & 25L.

\*Blackfriar® Exterior Wood Protector Gold Star limits fading from sunlight offering long-lasting protection for up to three years on vertical timber in most climates & up to 18 months on horizontal timber for coloured finishes. The clear finish should be inspected on a regular basis & a maintenance coat applied at the first sign of timber degradation or at least annually. †The dry film of Blackfriar® Exterior Wood Protector Gold Star is classed as a treated article & contains the surface biocides 4,5-dichloro-2-n-octyl-4-isothiazolin-3-one (0.114% by weight) & 3-iodo-2-propynyl butylcarbamate (0.171% by weight) for Part 7 film protection.

**SOLVENT-BASED**
